REQUIRED LANGUAGE

contaminant monitoring is to assist EPA in determining the occurrence of unregulated contaminants in drinking water and established drinking water standards. The purpose of unregulated Unregulated contaminants are those for which EPA has not whether future regulations are warranted.

## Water Quality Data Table

The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently.

results pertaining to fluoridation of our water system. The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 11. The percentage of fluoride samples collected in previous calendar year was within the optimal range of 0.6-1.2 ppm was 92%. \*To comply with the "Regulation Governing Fluoridation of Community Water Supplies", MS0170025 is required to report certain

Term	Definition
ppm	ppm: parts per million, or milligrams per liter (mg/L).
qaa	ppb: parts per billion, or micrograms per liter (ug/L).
NA	
S	ND: Not detected
NR	NR: Monitoring not required but recommended.
portant	nitions
	Definition
	MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which
MCEG	there is no known or expected risk to health. MCLGs allow for a margin of safety.
	MCL: Maximum Contaminant Level: The highest
MCL	water. MCLs are set as close to the MCLGs as feasible using the heat available treatment technology.
	TT: Treatment Technique: A required process
П	intended to reduce the level of a containinant in
	drinking water.
:	AL: Action Level: The concentration of a
AL	contaminant which, if exceeded, triggers treatment or
	other requirements which a water system must follow.
Variance	Variances and Exemptions: State or EPA permission
Exemption	certain conditions.
	Maximum residual disinfection level goal. The level
N I C	of a drinking water disinfectant below which there is
MIKULU	reflect the benefits of the use of disinfectants to
	control microbial contaminants,
MNR	MNR: Monitored, Not Regulated.
MRDI	Maximum Residual Disinfection Level: The highest level of a disinfectant allowed in drinking water.
	There is convincing evidence that addition of a dis- infectant is necessary for control of contaminants
